## CWW TRAINING MODEL

July 19, 2004

### **CWW TRAINING COMPONENTS**

## ORGANIZING THE COMPONENTS INTO A MODEL: CORE MODULES VIA DISTANCE, ASSESSMENT BASED "LEARNING EXTENSION LAB"

### 1) Prerequisites

### 2A) CWW Core Training Modules: DISTANCE BASED

3) Learning Assessment

2B) CWW Learning Extension Lab

MANDATORY
PREREQ: Use of
CARES Worker
Web End-User
Feedback
Web Site

OPTIONAL
PREREQ 1: Internet
Basics

OPTIONAL PREREQ 2: Introduction to Distance Learning

OPTIONAL PREREQ 3: Practice Page MODULE 1 INTRO TO CWW Background, vision and stragey

CWW NAVIGATION AND DATA ENTRY
Intelligent driver flow
Menu bar
Individual and sequence navigation
History navigation
Data entry screens
Summary screens

MODULE 3

MODULE 5
SEARCH, WORKER TOOLS, AND QUERIES
Search
Table search/display
TPL carrier find
FEIN find
Office worker find
Wage record
New Hire
UI record
Query screens

MODULE 7
CLEARANCE AND RELEVANCE

MODULE 9
OTHER CHANGES
TPL changes
CS changes?
Other?

MODULE 11
CWW ROLLOUT AND CASE TRANSITION
Rollout plan and impact
Case transition – when and how

MODULE 2
CWW SYSTEM CONVENTIONS AND
STANDARDS
Page layout
Buttons & Dropdowns
Functional comparison to CARES
Pages vs.screens

MODULE 4
USING HELP
System help
Policy (including info about revised HBs)
Process help
Links to other resources

MODULE 6A CLIENT REGISTRATION FOR CR STAFF MODULE 6B CLIENT REGISTRATION FOR NON CR STAFF

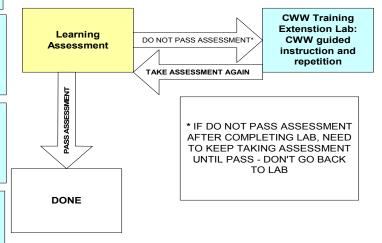

MODULE 8
COMMON PROCESSES (WHERE THERE
ARE CHANGES)
Adding program requests
Adding and deleting individuals
Other?

MODULE 10
ACCESS
WAMS
HOD
Jump between web and mainframe

MODULE 12 PRACTICE EXERCISES

MODULE 13 CWW FOR QUERY ONLY USERS

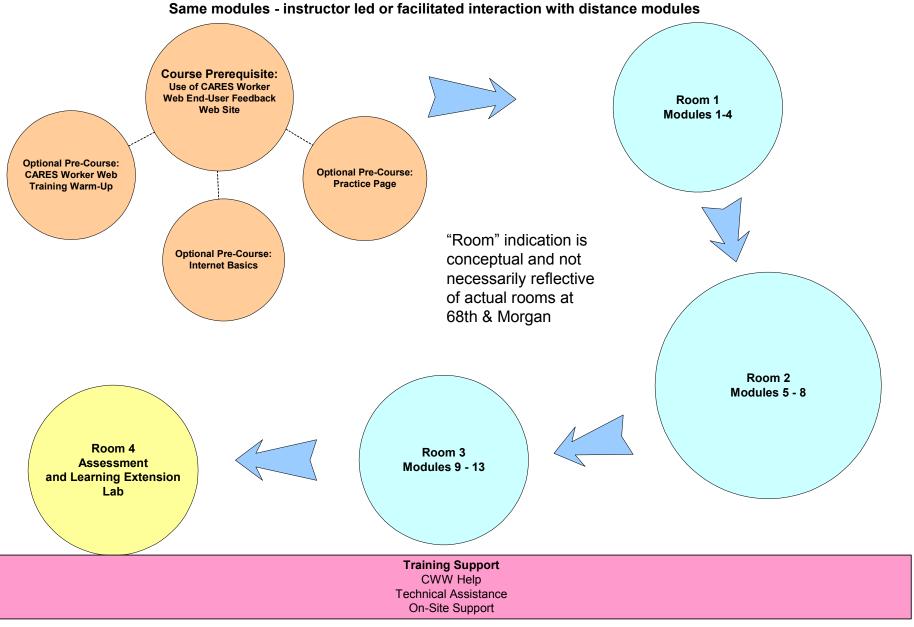

DRAFT - PROPOSED

### 4) Training Support

CWW Help
Technical Assistance
On Site Support

## Milwaukee model CARES Worker Web: A Progressive Dinner at 68th & Morgan

### CWW TRAINING ASSUMPTIONS SO FAR

 The CWW training package will be mandatory (needs some refinement and a statement about mandatory for exactly whom).

#### Core modules

- For the balance of state, the core modules will be offered via distance
- For Milwaukee there will be a more facilitated approach (a la the "progressive dinner" – needs more discussion)
- The CWW training strategy workgroup will continue to work on refining the concepts presented in the core modules and the order in which they will be presented.

### Assessment and Learning Extension Lab

- The assessment will be mandatory after completion of the core modules - the assessments will be fairly basic – address core competencies/skills of the CWW.
- Issuance of CWW IDs will be based upon assessment score
- Failure to receive a passing score will mean that no CWW access will be granted and trainee must attend the lab
- After taking the lab, trainees must take the assessment again and will not get their CWW ID until they pass
- We will market the lab so that people don't see it as an opportunity, but rather as repetitious That they will fail on purpose to take the lab.

### CWW TRAINING ASSUMPTIONS SO FAR

- We hope to **pilot our training approach with the pilot county** (ies) they will get an increased amount of on site support and TLC from us, but the training approach will be the same as it will be for the statewide rollout.
- Since there are limitations to using Authorware with this type of changing content, we will
  explore using the CWW training environment for hands on practice and activities. The
  workers we designate as needing access to the training environment will get access to both
  training and production with their CWW ID.
- Trainers will all be given access to the training environment and to UAT.
- There will be TtT events that will include our trainers and local agency representatives (trainers and/or CARES coordinators and/or transfer coordinators).
- A "S.W.A.G". for how long it will take to train the core modules is 2.5 days (20 hours?) –
  this is JUST A GUESS more work needs to be done on this once the content in the
  modules is finalized.
- We are exploring the possibility of establishing a "training call center" staffed with trainers to address customer needs with the distance approach.
- We need **buy in and support** at all levels to achieve success with the distance based approach. We will work with IMAC, W-2 C&I, and there will be an admin memo about CWW implementation in August that includes training information/directives.
- This entire approach will be shared with stakeholders including the trainers, IMAC and W-2 C&I.
- There will be a new worker hiatus based on the rollout schedule

## **IMPLEMENTATION TIMELINE**

ACTIVITY	DATE	
Pilot in one agency Pilot agency TBD – Sauk, Jefferson and Rock have been asked to pilot	January 21, 2005	
Additional pilot agencies	Feb/March 2005	36
Rollout Wave 1	May 1, 2005	
Rollout Wave 2	June 1, 2005	
Rollout Wave 3	July 1, 2005	
Rollout Wave 4	August 1, 2005	
Rollout Milwaukee	May – August 2005	
DRAFT - PROPOSED 7		

# CORE MODULE CONTENT AND DISTANCE DELIVERY METHOD - EXAMPLES

### MODULE 1 - INTRO TO CWW

### Topics included

Background

What is CWW

Comparisons to current CARES

Current project overview

Plans for future projects

#### Issues:

Content already exists in source material

Content is static

Can be written ASAP

Lots of text, not a lot of screen prints

### Media Selection tool outcome:

Possibilities: Workbook, PowerPoint

Web page

### Chosen delivery method:

(Example only) PowerPoint

## MODULE 2 - CWW SYSTEM CONVENTIONS AND STANDARDS

### Topics Included

Page layout

Buttons and dropdowns

Functional comparison to CARES

CWW pages vs. CARES screens

Saving data

Previous and next buttons

Visual cues (grey, white, etc.)

#### Issues

Interactivity is desirable but not imperative

Content is fairly static

Systems changes should be minimal

Can be written ASAP

### Media Selection tool outcome

Possibilities: Flash, ViewletBuilder movie, Authorware

### Chosen delivery method

(Example only) Authorware

# CORE MODULE CONTENT AND DISTANCE DELIVERY METHOD - EXAMPLES

ΡF

## MODULE 3 - CWW INTELLIGENT NAVIGATION AND DATA ENTRY

### Topics included

Intelligent driver flow

Menu bar

Individual and sequence navigation

History navigation

effective dates

Page types (detail, gatepost, summary, case summary)

### Issues:

Content is not static - there are many interdependencies

Systems changes are not complete

Interactivity is imperative

Cannot be written until systems changes are final

### Media Selection tool outcome:

Virtual classroom, Supported Independent activity packet, Authorware

### Chosen delivery method

(Example only) Virtual classroom with guided training environment exercises

### **MODULE 4 - USING HELP**

### Topics Included

System help

Policy (including information on revised on line handbooks)

Process help

Links to other resources

#### Issues

Interactivity is desirable but not imperative

Content is static

Systems changes should be minimal

Writing could probably start but may depend on EUF website feedback

### Media Selection tool outcome

Possibilities: Flash, ViewletBuilder movie, Authorware CBT

### Chosen delivery method

(Example only) Flash
